SUMMARY

I am a self-taught web developer with expertise in a comprehensive range of programming languages, including HTML, CSS, JavaScript, ReactJS, and PHP, among others. My commitment to continuous learning and exploration of emerging technologies has enabled me to cultivate a robust skill set. I possess a deep understanding of front-end and back-end development, leveraging my proficiency to create dynamic and responsive web applications. I am adept at translating design concepts into functional, user-friendly interfaces, and my hands-on experience extends to collaborative projects. Seeking opportunities to apply my versatile skill set and contribute to innovative web development initiatives

EDUCATION

Bachelor of Technology - BTech, Computer Science

Jawaharlal Nehru Technological University

📅 10/2020 - 07/2024

PROJECTS

Comet -an E-Commerce Website

📅 Date period   📍 Location

Comet is a cutting-edge e-commerce website that stands out for its exceptional responsiveness, visually appealing design, and robust functionality. Built with the latest web development technologies, Comet ensures a seamless and engaging user experience across various devices and screen sizes.

Responsive Design:
Comet's responsive design is a key feature that adapts seamlessly to different devices, including desktops, tablets, and smartphones. The website layout dynamically adjusts to provide an optimal viewing experience, ensuring that users can navigate and shop effortlessly from any device. This responsiveness contributes to a user-friendly interface, enhancing customer satisfaction and accessibility.

Visually Appealing Interface:
Comet prides itself on a visually stunning interface that captivates users from the moment they land on the homepage. A well-thought-out color scheme, high-quality images, and intuitive navigation elements contribute to a visually appealing design. The website employs modern and clean aesthetics, aligning with contemporary design trends to create a visually cohesive and attractive platform.
Fully Functional Features:
Comet boasts a range of fully functional features that enhance the overall shopping experience for users. These features include:

- What was a successful outcome of your work? (e.g. Raised $3,000 for the charity)

PROJECTS

Game Company Landing Page with Responsive Design

📅 Date period   📍 Location

The landing page features an intuitive design with visually appealing elements that seamlessly guide users through the site. Leveraging HTML, I ensured a solid structural foundation, optimizing accessibility and responsiveness. CSS was employed for aesthetically pleasing layouts and stylistic enhancements, maintaining a cohesive visual identity.

To elevate user interactivity, JavaScript was integrated for dynamic content updates and smooth transitions. The site promotes user engagement through clear calls-to-action and an immersive interface.

This project reflects my commitment to delivering seamless and visually captivating web experiences. I look forward to discussing how my skills can contribute to your team's objectives.

- What was a successful outcome of your work? (e.g. Raised $3,000 for the charity)
